DETAILED ACTION

1. This action is in response to the remarks received on August 20, 2009.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujikawa (USPN 4,356,871) in view of Dantigraber (USPN 4,132,506).

In reference to claims 1-10 and 26, Fujikawa discloses a hydraulic system comprising: a rotation circuit (drives drilling rod), a percussion circuit (drives striker), and a feed device circuit (drives feed actuator); a separate pump 1, 4, 10 for each respective circuit, wherein the feed device circuit pump is a variable displacement hydraulic pump whose output is thereby adjustable, subsequently adjusting the power of the feed device circuit; a rotation motor actuator 9, a percussion motor actuator D and a feed motor actuator 15 connected to the respective circuits; distinct pressure fluid tanks 49. Although Fujikawa discloses a separate hydraulic circuit powered by a variable displacement hydraulic pump, Fujikawa does not disclose specifically how the output of the hydraulic pump is monitored.

Schively, Jr. teaches a hydraulic system comprising: multiple hydraulic circuits separately controlled by respective pumps 104, 106; and a control unit 100 that monitors and adjusts the pumps 104, 106, respectively, in response to sensors 70, 110, 112, 114 (column 4 line

25- column 5 line 40). It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the hydraulic circuit system of Fujikawa to include the control unit of Schively, Jr, since Schively, Jr. suggests that such a modification prevents overpowering of the respective circuits and automatic control of the respective circuits.

Response to Arguments

4. Applicant's arguments, see page 8, filed March 25, 2010, with respect to the rejection(s) of claim(s) 1-10 and 26 under 35 USC 102(b) in view of Morrison have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Fujikawa (USPN 4,356,871) in view of Dantigraber (USPN 4,132,506).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations related to the claimed invention.
